BH MHS Assessment

Encounter Smart Template : Facility: CYS CEGU

FIN: 100022284089

Diagnosis Treated Today :

1. Major depressive disorder, single episode, unspecified (F32.9)
2. Post-traumatic stress disorder, acute (F43.11)
3. Separation anxiety disorder of childhood (F93.0)
4. Enuresis not due to a substance or known physiological condition (F98.0)
5. Homelessness unspecified (Z59.00)

Purpose of Visit : 90885-4 - Assessment - Review of Hospital Records

Intervention : Primary therapist reviewed the clinical psychiatric records obtained from College Hospital for evaluation and treatment planning purposes. Records indicate that Adriana's trauma abreactions and demanding of attention and constant care was too much for her foster caregivers that they had to call the social worker to take her back to CEGU Orangewood. This caused being separated from her 13 year old cousin, as she had settled in and made an adjustment in her current placement. Upon being removed from foster care, she stated that she wanted to die. Psychiatrist at College Hospital diagnosed PTSD - acute as she formulated that her removal retraumatized her to when she was separated from her family.

MHS Assessment PN Plan : Provider will integrate and incorporate client's psychiatric hospitalization history into case formulation. Continue to gather information to complete the assessment. SSA social worker is considering a more structured placement at an STRTP program.
